ISAM

Announcement and Call for Papers

## Welcome Message

Dear Colleagues

The Psychiatry Department in Kasr Al Aini, Faculty of Medicine has the pleasure to welcome you to its Fifth International Conference in Psychiatry.

Despite considerable advances in treatment strategies over the recent decades, psychiatric disorders continue to present a major clinical challenge. Research, the ultimate goal of treatment, is still only achieved in a limited percent of patients. Attempts to improve the treatment and management of different psychiatric disorders have involved not only the development of novel pharmaceutical agents but also optimization of strategies for administering those treatments.

Our conference aims to provide psychiatrists with up to date knowledge in the different key areas of psychiatry. We hope that the wealth of information provided is helpful and applicable in day- to -day practice and meaningfully contributes to the continuous professional development.

The broad perspective of this conference will help raising awareness regarding the current and future best practices in the different domains of psychiatry.

Our program is tailored such that it ensures a high level of interaction. In addition to listening to plenaries and talks from the Pioneers in different fields, you are invited to share your insights through panel discussions, lively debates and workshops.

We are looking forward to your supporting contributions through active sharing and enriching discussions

I hope that you find the meeting informative and enjoyable

**Prof. Momtaz Abdel Wahab**  
**Chairman of Psychiatry Department**
