Welcome Message

Dear Colleagues,

It is our great pleasure to issue the announcement of the annual conference of the Neuropsychiatric Department, Faculty of Medicine Suez Canal University in Ismailia, in collaboration with the Egyptian Psychiatric Association.

The theme chosen for this meeting is

"Egyptian Revolution and Mental Health"

It's been more than 12 months since the revolution that toppled the Mubarak government, and Egyptians are still reeling from the events that unfolded during the 18-day revolution, which at times saw

intensely violent confrontations between authorities and protesters.

And even though the revolution was a success,

many have discovered that the violence and stress are having a serious emotional and psychological impact

One of the most important factors affecting nearly everyone right now is uncertainty — they are living in an uncertain future that requires them to make important political decisions such as in the previous referendum on constitutional amendments, the parliamentary elections, or the upcoming presidential election

Our conference aims to share knowledge and experiences about the role of neuropsychiatrists currently and in the future for the welfare of mental health throughout the road of revolution. We hope this will be helpful and applicable in our practice. The other perspective of this conference will cover recent advances in different neuropsychiatric disorders.

We cordially invite you to participate in this meeting, which will be designed to provide opportunities for effective communication among neuropsychiatrists. Welcome to Ismailia, one of the most pleasant Egyptian Cities, located on the banks of Timsah Lake and Suez Canal and which is distinguished by its vast gardens and stable climate.

President of Conference

Prof. Magda Fahmy

Organizing Committee

Ass. Prof. Ahmed Abo-Haggar

Dr. Khaled A Moez

Dr. Yossry Ashour

Dr. Waleed Al Deeb

Dr. Amal Zakaria
