Heart-Neurosis

A description Study in the functional Heart Disorders
Origin

By: Dr rer. Nat Samer Rudwan

Summary

The functional heart disorders are considered as much common psychosomatically disorders which face the doctor and the specialist. Form of what. Is called "heart Neurosis" which is one of the heart disorder picture known since the 19th centry, even if it was known under different names. Although there is a problem between what is related to the classification and the many changes that occur on the classification of morbid picture (compare DSM-III, DSM-III-R –APA, ICD-9, ICD-10-WHO), but this idiom is still used commonly in the practice of the medical clinic, medical respiration and psychology. This study is dealing with the "Heart Neurosis". Subject treating the problem of definition and limitation; the patients of Heart Neurosis, in addition to the theories about; the Etiopathogenesis of heart Neurosis and finally the therapy and prognosis.
